EXPERIENCE

Aledade, Remote - *Software Engineer*

DEC 2018 - PRESENT

- Developed full stack features on a healthcare application (Python / Flask / AngularJS) helping primary care practices achieve savings in value-based care programs
- Collaborated with business intelligence team to refine practice performance metrics and build queries for metric reporting
- Create data visualization tool with D3 to display performance metric measurements, trends, and comparisons in app
- Helped set team-wide code standards such as ES6, BEM, and PEP 8

Tracer Labs, New York, NY - *Full Stack Developer II*

MAR 2017 - DEC 2018

- Developed full stack features on an adtech web application (Python / Django / EmberJS) tracking and reporting metrics from multiple advertising platforms, including Facebook and Google
- Optimized data retrieval and aggregation to enable users to view complex, dynamic reports on a responsive web interface
- Managed a team of four developers

Locke Lord LLP, Dallas, TX - *Attorney*

SEP 2011 - JUL 2016

- Practiced state and federal litigation
- Oversaw electronic discovery involving millions of digital files
- Managed teams of 10+ attorneys

Washington Mutual, Seattle, WA - *Financial Analyst*

JUL 2006 - JUL 2008

- Participated in a financial leadership rotation program
- Managed project to merge legacy database systems to create over $3 million dollars in cost savings
